ABOUT US

**WE ARE ENGINEERS
BOILERMAKERS
FABRICATORS
TECHNICIANS
WELDERS**

ABOUT VTS

For 25 years we have been leaders in quality, design and engineering in the vacuum tanker manufacturing industry. **Our passion for the job is our point of difference.**

With over 900 trucks, trailers and portable units built for operators Australia wide, we make sure our customers have the right equipment, training and ongoing support to run their business.

OUR **READY TO EARN** PHILOSOPHY

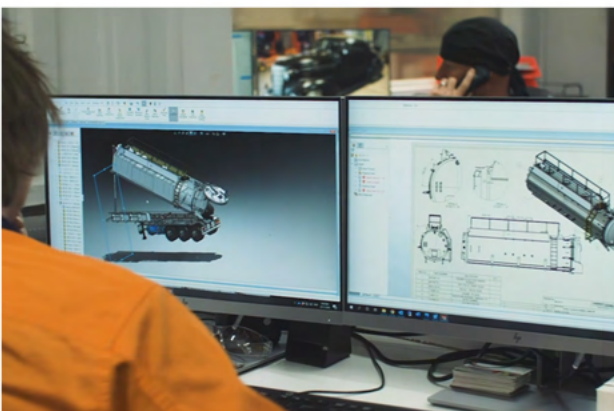

All VTS Premium Range models are **purposefully designed to sustain maximised income** for our customers while providing an **industry leading delivery turnaround.**

Our in-house engineers and manufacturing team carefully consider every detail to achieve **the highest standards of longevity and performance**, making sure your VTS tanker is the best you've ever had.

QUALITY ASSURANCE

Attention to detail and quality components are the VTS way.

All of our Premium Range models are designed to meet the rigorous AS1210/ 4343 Australian design standards.

VOLVO ***MUDVAC 10,000***

DESIGNED FOR LIQUID, SLUDGES AND MUDS

- 10,000 litre Capacity
- Steel, Tipping, Full Opening Rear Door Vacuum Tank
- 600 CFM Liquid Ring Vacuum Pump
- 1400 litres of fresh water
- High pressure Comet water pump

RELIABLE, EFFICIENT
VOLVO FE 6x4
+ RUGGED CONSTRUCTION
+ SIMPLE OPERATION
**= YOUR *ULTIMATE* MUD
WASTE SOLUTION!**

AS1210 CL3 AND AS4343 COMPLIANT

QUALITY - INTEGRITY - COMMITMENT

VOLVO

MUDVAC 10,000

FEATURES AND BENEFITS

Rugged construction

VTS build specification provides long term trouble free ownership.

Simple operation

Minimal training required for safe and efficient operation.

Easy to maintain

More time on the job, less time in the workshop.

Fit for purpose

Quiet, logical operation, great for most liquid wastes.

Quality products

- Hydraulically driven Liquid Ring Vacuum Pump (600 CFM)
- Molex inlet valve
- Hydraulic tip function
- Stainless steel separator and manifold
- 10,000 litre mild steel barrel made to AS1210 CL3 Hazard level B
- Volvo FE 350hp 6 x 4 with I-shift
- 1400 litres of fresh water with Comet HP water pump

VTS

Great products, ripper people and unbeatable aftersales support.

A partnership formed for you.

For the trucks within our Premium Range we have chosen Volvo as the cab chassis. And to ensure VTS customers enjoy unrivalled access and support, we have partnered with CMV Truck and Bus.

This connects VTS directly with Volvo's factories for ordering as well as their extensive Australian dealer network for unbeatable after sales support.

For you, this means:

A Focus on Whole of Life Ownership

The revered i-shift auto transmission is just one way that a Volvo truck provides your business with an easier driver experience, reduced operational costs, minimised downtime and increased product longevity.

Access to Leading Power and Engineering

- 30,000km maintenance intervals
- Reduced fuel consumption
- Heavy duty chassis for longer life
- Rapid response EBS system
- Air bag suspension
- Automated fuel efficiency and location data collection - coming soon via Volvo connect app

World Class Safety

With Swedish Cab Test Standard construction and global safety initiatives, we trust Volvo to never cut corners.

Quicker Delivery

Dramatically reduced delivery turnaround is a key part of our **Ready to Earn** philosophy. It's what gets VTS customers earning sooner.

VOLVO FE350

INTRODUCING THE VTS **LIQUID RING TOWER** TRUCK LIQUID RING PUMP OPTION

About

The VTS liquid ring tower is a simple, powerful and proven design that provides significantly increased carryover resistance and an easier operation and maintenance experience.

VTS recommend this pump for those seeking a quiet and powerful vacuum pump experience with a high tolerance to carryover.

Info

Powerful 600CFM Pompetravaini trvx Liquid Ring pump

Intelligent design and mounting

Stainless Steel 304 construction

Liquid seal technology = high carryover resistance

VTS

Great products, ripper people and unbeatable aftersales support.

INTRODUCING THE **FRUITLAND 870 ELIMINATOR-H** TRUCK VANE PUMP OPTION

FEATURES AND BENEFITS

About

The Fruitland 870 is a Canadian built rotary vane pump.

The **eliminator** mounting system (exclusive to VTS), is an intelligent design system providing one **ready to rig** mount to simplify operation and maintenance.

VTS recommends this package to our customers seeking a vane pump due to its increased air flow, design simplicity and superior build quality.

Pump Specs

Approximate Air Flow:	501CFM
Maximum Vacuum:	-96.5Kpa
Size of Hoses:	4"
Operating Speed:	1400RPM
Lubrication:	Automatic Oil Pump
Vanes:	8 Kevlar
Cooling:	Air cooled
Drive System:	Hydraulic

TIPPERVAC

BULK VACUUM TANKER

FEATURES AND BENEFITS

Rugged construction

Long term trouble free ownership.

Simple operation

Minimal training required for safe and efficient operation.

Easy to maintain

More time on the job, less time in the workshop.

Fit for purpose

Designed for sludges and muds, 25 degree tip angle and full opening rear door assist in off loading. On-board fresh water and High pressure water pump.

Quality products

- Fruitland Vacuum Pump
- Hatz watercooled diesel motor
- Molex ball valves
- Fuwa KHitch air bag suspension
- Wabco ABS/EBS system

Self-contained

Put it behind any truck, any time, anywhere.

VTS

Great products, ripper people and unbeatable aftersales support.

INTRODUCING THE **FRUITLAND 870 ELIMINATOR-D** TRAILER VANE PUMP SYSTEM

FEATURES AND BENEFITS

About

The Fruitland 870 is a Canadian built rotary vane pump.

The **eliminator-d** mounting system (exclusive to VTS), is an intelligent design system providing one **ready to rig** mount, including the 3cylinder Hatz diesel engine.

VTS utilises this package on our Premium Range trailers to achieve a totally self sufficient vacuum trailer unit.

Pump Specs

Approximate Air Flow:	501CFM
Maximum Vacuum:	-96.5Kpa
Size of Hoses:	4"
Operating Speed:	1400RPM
Lubrication:	Automatic Oil Pump
Vanes:	8 Kevlar
Cooling:	Air cooled
Drive System:	3cyl Diesel Hatz Engine

EVAC 800

PORTABLE VACUUM UNIT

FEATURES AND BENEFITS

The VTS EVAC range is suited to all forms of liquid and sludge type wastes (not designed for hydro excavation or DG wastes). Proven rugged design coupled with stainless steel construction to wet areas means the full EVAC range will last a long long time. Top quality components from Europe and the US coupled with VTS's "simple is more" design makes for a cost effective and practical solution.

Australian Standard compliance is essential in today's business environments. The VTS EVAC range meets AS1210 for Pressure Vessels and also AS4343 for Hazard Levels. Don't leave yourself open to hefty fines due to non compliance!

VACUUM TANK

- Constructed from 5mm GR304 Stainless Steel
- Mounted on a mild steel skid frame, able to be forklifted from all four sides
- Top wash out manway
- Sight Glasses to observe waste level in tank
- Tie Down and lifting points
- 680kg empty weight
- Dimensions 1527mm L, 1280mm W, 1750mm H

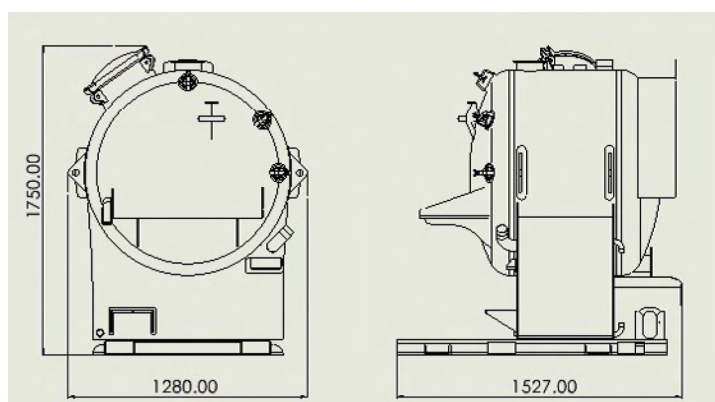

VACUUM SYSTEM

- 70 CFM Conde vacuum pump, vacuum and pressure capable
- Honda 5.5hp petrol engine (Optional Hatz 6hp diesel) with battery and electric start
- 50mm vacuum system, 10m of suction hose fitted with 75mm inlet to tank and blockage access
- 75mm discharge valve
- Primary Shut Off
- Secondary Shut Off
- Oil Catch Muffler
- Pressure relief valve and Vacuum relief valve
- Vacuum and Pressure Gauge

WATER SYSTEM

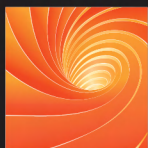

- 300 litre fresh water capacity with sight tube
- Honda petrol powered water pump 25mm
- Retractable steel hose reel with 15m of water delivery hose
