Built for Australian conditions. Proven since 1998.

Vacuum Truck Supplies (VTS) was founded by service operators, who understand what goes into a successful pumping operation.

About VTS

We are industry leaders in quality, design and engineering of vacuum tanker manufacturing for over 25 years. Our passion for the job is our point of difference.

We have built and supplied over 1,000 trucks, trailers and portable units for operators Australia wide and we make sure our customers have the right equipment, training and ongoing support to run their business.

Our 'Ready-to-Earn' Philosophy

All VTS tankers are purposefully designed to sustain maximised income for our customers.

Our in-house engineers and manufacturing team carefully consider every detail to achieve the highest standards of longevity and performance, making sure your VTS tanker is the best you've ever had.

Premium Trucks

Volvo Cab Chassis

We have chosen Volvo as the cab chassis for the trucks within our Premium Range; and partnered with CMV Truck and Bus to ensure you enjoy unrivaled access and continual after sales support.

Rugged Construction

VTS specification provides long-term trouble-free ownership.

Easy to Maintain

More time on the job, less time in the workshop.

Fit for Purpose

Quiet, logical operation; great for most liquified and liquid wastes.

Simple Operation

The unique and major design feature of all our solutions is the non-computer control system. This means the vehicles rely on mechanical and hydraulic engineering standards that have been proven for decades, rather than complex electronic systems.

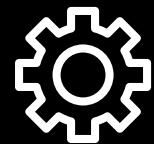

This delivers simplicity in diagnostics, repair and maintenance, and improved uptime, all of which are of critical importance to every job. It also helps to lower the total cost of ownership throughout the asset's life.

MAXIMISED
WASTE CAPACITY

HIGH PERFORMANCE
VACUUM PUMP

MINIMISED
DOWNTIME

MudVac

10,000L

Designed for liquid,
sludge and mud.

LiquidVac

7,000 / 11,000L

Designed for
liquid waste.

LiteVac

12,500L

Designed for sludges
and liquid waste.

SIMPLIFIED

Volvo Cab Chassis

We have chosen Volvo as the cab chassis for the trucks within our Premium Range; and partnered with CMV Truck and Bus to ensure you enjoy unrivaled access and continual after sales support.

DiggerVac

7,000 / 9,000L

Designed for hydro excavation.

Rear boom and drain cleaning reel

Rear door mounted with 180° rotational range allowing for ease of operation in any area. LED work lights for safety and IR remote controlled boom with manual override if required.

Non Destructive Digging (NDD) reel

Located low at rear of unit for easy access at all times. Contains 30m of 13mm hose delivering robust NDD performance.

Simplified control system

'Simple is better' philosophy with no computer interfaces, allowing for ease of operation, diagnostics and repair. Autotronic remote control units are supplied.

High performance vacuum and water pump

Powerful, yet whisper quiet and lightweight, delivering high performance for all day/night time applications. Belt driven reducing maintenance costs.

DrainVac

6,000 / 8,000L

Designed for drain cleaning and hydro excavation.

Quality System

- Hydraulically driven Liquid Ring Vacuum Pump 1,000 m³/h – 600 CFM
- Molex inlet valve
- Hydraulic tip function
- Stainless steel separator and manifold
- 11,000 litre mild-steel barrel made to AS1210 CL3
- Volvo FE 4x2 with I-shift
- 1,200 litres of fresh water with 26 LPM/210 BAR Water Pump

LiquidVac 7,000L

DESIGNED FOR
LIQUID WASTE

7,000L
Capacity

Mild steel, tipping,
vacuum tank

1,000 m³/h – 600 CFM
Liquid Ring Vacuum Pump

1,200 litres of fresh water with
26 LPM/210 BAR water pump

AS1210 CL3 and
AS4343 compliant

LiquidVac 11,000L

DESIGNED FOR
LIQUID WASTE

11,000L
Capacity

Mild steel, tipping,
vacuum tank

1,000 m³/h – 600 CFM
Liquid Ring Vacuum Pump

1,200 litres of fresh water with
26 LPM/210 BAR water pump

AS1210 CL3 and
AS4343 compliant

Quality System

- Hydraulically driven Liquid Ring Vacuum Pump 1,000 m³/h – 600 CFM
- Molex inlet valve
- Hydraulic tip function
- Stainless steel separator and manifold
- 11,000 litre mild-steel barrel made to AS1210 CL3
- Volvo FE 350hp 6x4 with I-Shift
- 1,200 litres of fresh water with 26 LPM/210 BAR Water Pump

Quality System

- Hydraulically driven Liquid Ring Vacuum Pump 1,000 m³/h – 600 CFM
- Molex inlet valve
- Hydraulic tip function
- Stainless steel separator and manifolding
- 10,000 litre mild-steel barrel made to AS1210 CL3
- Volvo FE 350hp 6x4 with I-Shift
- 1,200 litres of fresh water with 26 LPM/210 BAR Water Pump

MudVac

10,000L

DESIGNED FOR LIQUIDS,
SLUDGE AND MUDS

10,000L
Capacity

Steel, tipping, full opening
rear door vacuum tank

1,000 m³/h – 600 CFM
Liquid Ring Vacuum Pump

1,200 litres
of fresh water

26 LPM/210 BAR
water pump

AS1210 CL3 and
AS4343 compliant

Quality System

- Hydraulically driven Liquid Ring Vacuum Pump 1,000 m³/h – 600 CFM
- Molex inlet valve
- Hydraulic tip function
- Stainless steel separator and manifold
- 12,500 litre aluminium barrel made to AS1210 CL3
- Volvo FE 350hp 6x4 with I-Shift
- 1,000 litres of fresh water with 26 LPM/210 BAR Water Pump

LiteVac 12,500L

DESIGNED FOR
LIQUID WASTE

12,500L
Capacity

Aluminium, tipping,
vacuum tank

1,000 m³/h – 600 CFM
Liquid Ring Vacuum Pump

DiggerVac

6x4

A VERSATILE AND MODERN
SOLUTION FOR HYDRO EXCAVATION

5mm 304 stainless
steel barrel

Hydraulic tipping and
full opening rear door

Fully hydraulic
150mm suction boom

UDOR NDD pump 17 LPM/300 BAR
13mm 30m spring retractable hose reel

DiggerVac 7,000

- Capacity: 7,000L Waste, 3,500L Water
- Cab Chassis: Volvo FE 350hp 6x4 with I-Shift
- **Vacuum Pump: 4,000 m³/h – 2,350 CFM**
Jurop Helix blower

Simplified control system:
no computers, no worries!

DiggerVac

8x4

A VERSATILE AND MODERN
SOLUTION FOR HYDRO EXCAVATION

5mm 304 stainless
steel barrel

Hydraulic tipping and
fully hydraulic rear door

Fully hydraulic
6" suction boom

UDOR NDD pump 17 LPM/300 BAR
13mm 30m spring retractable hose reel

DiggerVac 9,000

- Capacity: 9,000L Waste, 4,000L Water
- Cab Chassis: Volvo FM 410hp 8x4
- Stainless steel separator and manifolding
- Molex fully rebuildable inlet/dump ball valves
- Wireless remote control with manual control backup
- **Vacuum Pump: 6,000 m³/h – 3,590 CFM**
Jurop Helix blower, belt driven

Simplified control system:
no computers, no worries!

DrainVac 6,000

- Capacity: 6,000L Sludge, 5,500L Water
- Cab Chassis: Volvo FE 350hp 6x4 with I-Shift
- Pratissoli Drain cleaning pump
270 LPM/155 BAR, 25mm 180m hydraulic
drive hose reel
- **Vacuum Pump: 3,050 m³/h – 1,800 CFM CVS
liquid ring vacuum pump, belt driven**

5mm 304 stainless
steel barrel

Hydraulic tipping and
full opening rear door

Fully hydraulic 150mm
suction boom

UDOR NDD pump 17 LPM/
300 BAR 13mm 30m spring
retractable hose reel

Pratissoli Drain cleaning
pumps with 25mm 180m
hydraulic drive hose reel

Simplified control
system: no computers,
no worries!

DrainVac 6x4

A VERSATILE AND MODERN
SOLUTION FOR DRAIN CLEANING
AND HYDRO EXCAVATION

DrainVac 8,000

- Capacity: 8,000L Sludge, 4,000L Water
- Cab Chassis: Volvo FM 410hp 8x4
- Stainless steel separator and manifolding
- Molex fully rebuildable inlet/dump ball valves
- Pratisoli Drain cleaning pump
346 LPM/170 BAR, 25mm 180m
hydraulic drive hose reel
- **Vacuum Pump: 4,000 m³/h – 2350 CFM CVS
liquid ring vacuum pump, hydraulically driven**

5mm 304 stainless
steel barrel

Hydraulic tipping and
full opening rear door

Fully hydraulic 6" suction
boom, 20m length

UDOR NDD pump 17 LPM/
300 BAR 13mm 30m spring
retractable hose reel

Pratisoli Drain cleaning
pump 346lpm/170bar,
1" 180m

Simplified control
system: no computers,
no worries!

DrainVac 8x4

A VERSATILE AND MODERN
SOLUTION FOR DRAIN CLEANING
AND HYDRO EXCAVATION

Premium Tankers

Self-contained

Put it behind any suitable truck,
any time, anywhere.

Rugged Construction

Long term trouble free ownership.

Simple Operation

Minimal training required for
safe and efficient operation.

Easy to Maintain

More time on the job,
less time in the workshop.

Fit for Purpose

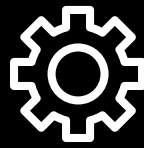

The perfect solution for bulk septic, grease
trap, and industrial waste water work. Tough,
reliable, and made to handle heavy sludge
waste with ease.

BULK WASTE
SOLUTION

SELF-CONTAINED
VACUUM AND
HYDRAULIC SYSTEM

MINIMISED
DOWNTIME

TipperVac

22,000L

Designed for bulk sludge
and mud waste.

TriVac

24,000L

Designed for bulk liquid waste.
Fully self-contained
vacuum system.

Quality System

- CAT watercooled diesel motor
- Molex ball valves
- Air bag suspension
- Wabco ABS / EBS system
- Now available with Pompetravaini TRVX 1007 Liquid Ring pump

TipperVac 22,000L

DESIGNED FOR BULK LIQUID,
SLUDGE AND MUD

22,000L
Capacity

25° tip angle and full
opening rear door

Fully self-contained vacuum
and hydraulic system

Self-contained: put it
behind any truck

On-board fresh water and
high pressure water pump

AS1210 CL3 and
AS4343 compliant

TriVac 24,000L

DESIGNED FOR
BULK LIQUID WASTE

Quality System

- Masport Vacuum Pump
- On-board diesel motor
- Molex ball valves
- Air bag suspension
- Wabco ABS / EBS system
- Now available with Pompetravaini TRVX 1007 Liquid Ring pump

24,000L
Capacity

Fully self-contained
vacuum system

Self-contained: put it
behind any truck

Available with either vane
or liquid ring vacuum pump

AS1210 CL3 and
AS4343 compliant

Premium Portables

FULLY COMPLIANT WITH
AUSTRALIAN STANDARDS

HIGH PERFORMANCE
VACUUM OPERATION

HIGH PERFORMANCE
PRESSURE OPERATION

All forms of liquid/sludge waste

Sewerage, septic, portable toilet, feedlot/ agricultural sludges, aquaculture/fish waste, industrial, concrete cutting waste, paint booth sludges, communication pits, oily waters, waste cooking oil, and many other wastes.

HookVac

10,000L

Designed for you to add liquid waste to your hooklift fleet.

Rugged Construction

Proven rugged design, coupled with stainless steel construction for wet areas means our EVac range will last a very long time.

EVac 800

300L Fresh Water
800L Waste Capacity

Suited to all forms of liquid waste.

Quality Components

Top quality European and USA componentry; coupled with VTS's 'simple is more' design makes for a cost effective and practical solution.

EVac 1,600

600L Fresh Water
1,600L Waste Capacity

Suited to all forms of liquid waste.

Australian Standards

The VTS EVac range meets AS1210 for Pressure Vessels and AS4343 for Hazard Levels.

EVac 3,200

1200L Fresh Water
3,200L Waste Capacity

Suited to all forms of liquid waste.

All the benefits of the VTS Range

- Durable and robust construction
- Simple operation and maintenance
- Increased utilisation
- Purpose build to the same high quality as all our systems
- Self-contained for ultimate flexibility
- Simple solution for complex problems
- Create a better bottom line.

Operates on or off any
suitable hooklift truck

10,000L mild steel vacuum
tank, designed to AS1210 CL3

HookVac 10,000L

DESIGNED FOR YOU TO
ADD LIQUID WASTE TO
YOUR HOOKLIFT FLEET

Fully self-contained Masport Cobra
vacuum package (920 m³/h – 540 CFM)
belt driven by diesel auxiliary engine.

Vacuum Tank

- Constructed from 5mm GR304 stainless steel
- Mounted on a mild steel skid frame, able to be forklifted from all four sides
- Top wash out man-way
- Sight glasses to observe waste level in tank
- Tie down and lifting points

Vacuum System

- 50mm vacuum system, 10m suction hose fitted with 75mm inlet to tank and blockage access
- 75mm discharge valve
- Primary, secondary shutoff
- Oil catch muffler
- Pressure relief valve and vacuum relief valve
- Vacuum and pressure gauge

Water System

- 300 litre fresh water capacity with sight tube
- Retractable steel hose reel with 20m of water delivery hose
- Petrol powered water pump, 25mm

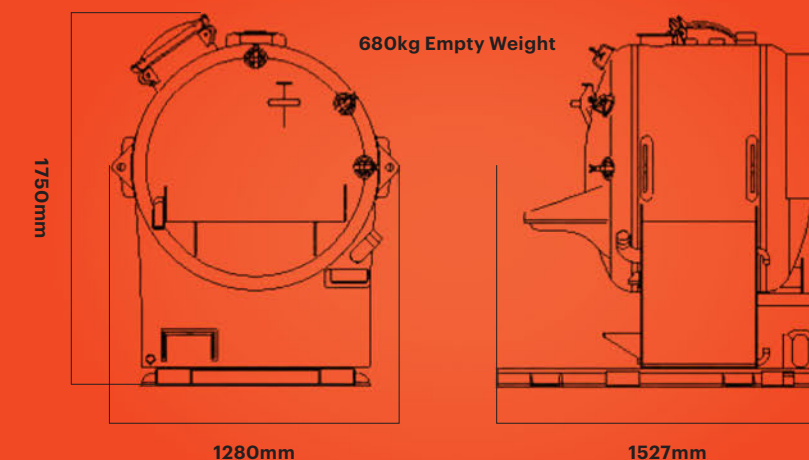

EVac 800

SUITED TO ALL FORMS OF LIQUID WASTE*

*Not designed for hydro excavation or DG wastes

Can be registered with
Worksafe as plant equipment

AS1210 CL3 and
AS4343 compliant

Support

AROUND THE
CLOCK SUPPORT

COMPREHENSIVE
PARTS & ACCESSORIES

Keep your fleet running — anytime, anywhere

At Vacuum Truck Supplies, we know that downtime costs you money. That's why we've made it easier than ever to keep your trucks working at their best.

- ✓ **Spare Parts Website** – Browse and order from our full range of genuine VTS spare parts online, 24/7. From filters and seals to hydraulic components and pump accessories, everything you need is just a click away. Clear categories, detailed product info, and fast shipping mean less waiting and more working.
- ✓ **Expert Phone Support** – Prefer to talk to a real person? Our experienced team is only a phone call away. With decades of hands-on knowledge, they'll help you identify the right part, troubleshoot issues, and keep your equipment running smoothly. No guesswork — just reliable advice you can trust.

Whether you're managing a single truck or a full fleet, our spare parts website and dedicated support line are your insurance policy against costly delays. Because at VTS, it's not just about building trucks — it's about keeping them on the road, earning you profit, every single day.

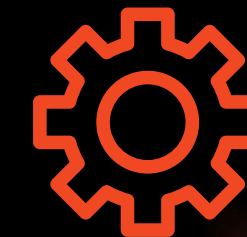

Vacuum Truck Supplies – Quality, Integrity, Commitment.

Our 'ready-to-earn' difference

**We are Engineers,
Boilermakers, Fabricators,
Technicians, and Welders.**

Our in-house engineers and manufacturing team carefully consider every detail to achieve the highest standards of longevity and performance, making sure your VTS tanker is the best you've ever had.

VTS & NozzTeq® – Problem solvers and system suppliers.

NozzTeq® was founded in 2006, as daughter company in the United States of the parent company AquaTeq® located in Sweden. AquaTeq® noticed deficiencies in nozzle designs of the time, so took on the challenge to increase nozzle efficiency for the sewer and storm water cleaning industry.

With their proven innovation of the designs, they brought that to North America, hence the forming of NozzTeq®.

Throughout the years they have created several new products, so unique that they have been patented both in the United States and internationally.

VTS are Industry Leaders in quality, design and engineering of vacuum tanker manufacturing for over 25 years. Our passion for the job is our point of difference.

We have built and supplied over 1,000 trucks, trailers and portable units for operators Australia wide and we make sure our customers have the right equipment, training and ongoing support to run their business.

Come to us with your problems and we will develop a tailor-made solution that will perform with the highest efficiency, lowest possible energy consumption and is fit for purpose.

VTS & Volvo; a partnership built for you.

For the trucks within our Premium Range we have chosen Volvo as the cab chassis. To ensure VTS customers enjoy unrivaled access and support, we have partnered with CMV Truck and Bus.

This connects VTS directly with Volvo's factories for the ordering as well as their extensive Australian dealer network for unbeatable after sales support.

For you this means:—

A focus on 'Whole-of-Life' ownership

The revered i-Shift auto transmission is just one way that a Volvo truck provides your business with an easier driver experience, reduced operational costs, minimised downtime and increased product longevity.

Access to leading power and engineering

- 30,000km maintenance intervals
- Reduced fuel consumption
- Heavy duty chassis for longer life
- Rapid response EBS system
- Air bag suspension
- Automated fuel efficiency and location data collection via Volvo connect app

World-class safety

With Swedish Cab Test Standard construction and global safety initiatives, we trust Volvo to never cut corners.

Quicker delivery

Dramatically reduced delivery turnaround is a key part of our 'Ready-to-Earn' philosophy. It's what gets VTS customers earning sooner.

Premium Trucks	Waste Capacity	Water Capacity	Vacuum Pump	Vacuum Tank	Transportation	Suitability
MudVac 10,000	10,000L	1,200L	1,000 m³/h 600 CFM	Steel	Volvo FE350hp 6 x 4 I-Shift	Designed for liquid, sludge and mud

VTS Ready Reckoner

Specialised Design

We’ve combined learnings from over 1,000 builds into the design of each of our Premium Range units. You can be sure that on delivery day, your unit will be ‘ready-to-earn’.

Simplified Maintenance

Intelligent design and only the highest quality components work together to keep you on the road.

Leading Delivery Turnaround

Strategic partnerships and streamlined design and build processes means an unbeatable delivery turnaround for every VTS customer.
