

DIGGERVAC 7000

The DiggerVac 7000 is a practical hire solution for operators who need hydro excavation capability without committing to a full purchase. It is suited to NDD, service locating, potholing and slurry recovery, giving businesses the flexibility to take on extra work, cover peak demand or support a specific project with the right equipment for the job.

Designed around simple operation and efficient site performance, the DiggerVac 7000 helps crews get set up quickly, work safely around underground services and recover spoil with less fuss. Easy-to-use controls, practical maintenance access and reliable performance all help reduce downtime, save time on site and keep the truck earning.

SPECIFICATIONS

Model	DiggerVac 7000
Capacity	7,000L Waste – 3500L Water
Size	6x4
Cab Chassis	Volvo FE 350HP 6x4 with I-Shift
Vacuum Pump	4,000 m ³ /h – 2350 CFM Juroop Helix blower, Belt driven
Suction Boom	Fully hydraulic 150mm cassette style boom
Barrel	5mm 304 stainless steel
Tipping	Hydraulic Tipping and Fully Hydraulic Rear Door
NDD Water System	UDOR NDD pump 17LPM/300BAR, 13mm 30m SS spring return hose reel
Manifold	Stainless steel separator and manifolding
Inlet and Dump Valve	Molex fully rebuildable ball valves
Controls	Wireless remote control with manual control backup. Simp lified control system: no computers, no worries!

DIGGERVAC 9000

The DiggerVac 9000 is suited to larger hydro excavation and NDD projects where extra capacity and productivity matter. For businesses needing short-term support, additional fleet capacity or a unit for a bigger contract, it gives operators the ability to take on serious service locating, potholing and slurry recovery work without waiting on a new build.

Built for practical site use, the DiggerVac 9000 helps reduce interruptions by giving crews more working capacity between disposal and refill points. Its simple operating layout makes it easier for hire customers to get familiar with the unit quickly, while strong vacuum performance, high-pressure water capability and practical controls help keep jobs moving safely and efficiently.
