

DRAINVAC 7000

The DrainVac 7000 is a versatile hire option for businesses needing drain cleaning, hydro excavation and vacuum recovery in one practical unit. It is well suited to blocked drains, service locating, slurry recovery and site clean-up, helping crews handle a wider range of jobs without needing multiple pieces of equipment on site.

For hire customers, the DrainVac 7000 offers the flexibility to respond quickly when workloads increase, contracts change or an urgent job lands in the diary. Its simple controls, practical layout and efficient setup help operators get working sooner, reduce wasted time and keep the job moving with less fuss.

SPECIFICATIONS

Model	DrainVac 7000
Capacity	7,000L Sludge – 3,500L Water
Size	6x4
Cab Chassis	Volvo FE 350HP 6x4 with I-Shift
Vacuum Pump	3,050 m ³ /h - 1,800 CFM CVS liquid ring vacuum pump
Suction Boom	Fully hydraulic 150mm suction boom
Drain Cleaning Water System	Pratissoli Drain cleaning pump 270lpm/155bar, 25mm 180m hydraulic drive hose reel.
Barrel	5mm 304 stainless steel
Tipping	Hydraulic Tipping and Fully Hydraulic Rear Door
NDD Water System	UDOR NDD pump 17LPM/300BAR, 13mm 30m SS spring return hose reel
Manifold	Stainless steel separator and manifold
Inlet and Dump Valve	Molex fully rebuildable ball valves
Controls	Wireless remote control with manual control backup. Simplified control system: no computers, no worries!

DRAINVAC 8000

The DrainVac 9000 is a larger-capacity hire solution for operators who need drain cleaning, hydro excavation and vacuum recovery capability in one unit. It is well suited to bigger drainage jobs, service locating, slurry recovery, blocked drains and site clean-up where crews need strong performance and the flexibility to handle different work during the same hire period.

For businesses managing peak demand, project work or temporary fleet gaps, the DrainVac 9000 helps keep jobs moving without tying up multiple machines. Its practical operating layout, efficient setup and easy-to-use controls help operators get productive quickly, while the added capacity supports longer working time on site before unloading or refilling.

SPECIFICATIONS

Model	DrainVac 8000
Capacity	8,000L Sludge – 4,000L Water
Size	8x4
Cab Chassis	Volvo FM 410HP 8x4
Vacuum Pump	4,000 m ³ /h - 2,350 CFM CVS liquid ring vacuum pump, hydraulically driven
Suction Boom	Fully hydraulic 150mm cassette style boom
Drain Cleaning Water System	Pratissoli Drain cleaning pump 346lpm/170bar, 25mm 180m hydraulic drive hose reel.
Barrel	5mm 304 stainless steel
Tipping	Hydraulic Tipping and Fully Hydraulic Rear Door
NDD Water System	UDOR NDD pump 17LPM/300BAR, 13mm 30m SS spring return hose reel
Manifold	Stainless steel separator and manifold
Inlet and Dump Valve	Molex fully rebuildable ball valves
Controls	Wireless remote control with manual control backup. Simplified control system: no computers, no worries!
