

EVAC RANGE

*EVAC 1,600 pictured

The EVAC range is available in 800, 1600 or 3200 litre capacity and is a practical hire option for customers who need vacuum capability without bringing in a full-sized truck. Compact, portable and easy to position, EVAC units are well suited to liquid recovery, site clean-up, tight-access jobs and maintenance work where space, speed and simplicity matter.

For hire customers, the EVAC range gives flexibility to take on smaller vacuum jobs quickly and efficiently. Simple operation, easy transport and a practical setup help crews get to work faster, reduce downtime and avoid using larger equipment where it is not needed. Small footprint. Useful capacity. Ready to earn its keep.
