

LIQUIDVAC 7000

The LiquidVac 7000 is a practical hire solution for customers needing reliable liquid waste recovery and transport in a straightforward, easy-to-use unit. It is well suited to septic, wastewater, commercial and general liquid waste work where crews need dependable vacuum performance without bringing in more equipment than the job requires.

For hire customers, the LiquidVac 7000 offers a simple way to add capacity, cover extra workload or keep jobs moving while another unit is unavailable. Its practical size, easy operation and efficient setup help operators get working quickly, reduce wasted time on site and keep liquid waste jobs running smoothly.

SPECIFICATIONS

LIQUIDVAC 11000

The LiquidVac 11000 is a higher-capacity hire solution for customers needing dependable liquid waste recovery and transport. It is well suited to septic, wastewater, industrial, commercial and general liquid waste work where crews need more volume on board while keeping the setup practical and easy to operate.

For hire customers, the LiquidVac 11000 helps reduce unnecessary trips, support larger jobs and add capacity during busy periods or fleet downtime. Its straightforward operation and efficient design help crews get productive quickly, save time on site and keep liquid waste work moving with less fuss.
