

LITEVAC 12500

The LiteVac 12500 is a practical hire solution for customers needing liquid waste recovery and transport with good capacity and simple operation. It is well suited to septic, wastewater, commercial and general liquid waste work where crews need dependable vacuum performance without overcomplicating the job.

For hire customers, the LiteVac 12500 helps add capacity quickly during busy periods, project work or fleet downtime. Its straightforward operating setup makes it easier for crews to get familiar with the unit, while the practical design helps save time on site, reduce unnecessary delays and keep liquid waste jobs moving.
