

TIPPERVAC

The TipperVac is a high-capacity hire solution for customers needing bulk liquid waste, sludges and muds recovered and transported efficiently. It is well suited to industrial work, shutdowns, civil projects, waste transfer, site clean-ups and larger liquid waste jobs where crews need serious holding capacity without committing to a full purchase.

For hire customers, the TipperVac helps keep work moving by reducing unnecessary trips and improving turnaround on site. Its self-contained vacuum and hydraulic systems, hydraulic tipping tank and full-opening rear door make loading, transporting, tipping and clean-out simple and efficient. Big capacity. Simple operation. Less mucking around.

SPECIFICATIONS
